Set14 saved predictions: structure of the non-scalar remainder (cell doubled)
A. Energy shrinks; alignment partly offsets it
Net remainder H
Residual energy
Error correlation term
RGB MSE x 1e6
Scale
B. 70.9% of H decrease at r = 0.1875-0.375
H decrease x 1e6
Output frequency r
C. Contributions depend strongly on image
comic
monarch
zebra
flowers
man
bridge
ppt3
coastguard
lenna
baboon
pepper
foreman
face
barbara
Signed share of H decrease (%)
D. Residual fraction and available energy
Native-output energy U
Residual fraction kappa
Residual-energy decrease x 1e6
2 to 3
3 to 4
4 to 6
2 to 6
E. Alignment is weak, positive, and non-monotone
liif
lte
sc-inr
Error-residual alignment rho
Scale
F. Refit after leaving one image out
zebra
